

19. LASLUIA LUCIO ERICK ALEXANDER

The screenshot shows an IDE window with two tabs: `Chicken.java` and `ChickenFarmSimulator.java`. The `ChickenFarmSimulator.java` tab is active, displaying the following Java code:

```
1  * Author Erick Lasluisa, Pythons, DCCD-ESPE
2  */
3
4  public class ChickenFarmSimulator {
5
6      public static void main(String[] args) {
7          System.out.println("Erick Lasluisa");
8          System.out.println("Setters and getters");
9          System.out.println("=====");
10
11          Chicken chicken;
12          chicken = new Chicken(); //initializing the chicken
13
14          chicken.setId(423);
15          chicken.setName("Lucy");
16          chicken.setAge(4);
17          chicken.setColor("White and Brown");
18          chicken.setInMolting(false);
19      }
20  }
```

Below the code editor, the `Output - HolaMundo [run]` window shows the execution results:

```
run:
Erick Lasluisa
Setters and getters
=====
Chicken id --> 423
Chicken name --> Lucy
Chicken age --> 4
Chicken color --> White and Brown
Chicken Is Molting --> false
BUILD SUCCESSFUL (total time: 0 seconds)
```

The status bar at the bottom right indicates "241 INS Windows (CR)".
