Source Code: Misspelled vortables, excessively rested to Build scrips: Several people parton the same part. I and understand what logic the program should use. Implementation notes: The new functionality is wrong. Test cases: That the program is accepted even without being accepted by the public. Tack of time. De program Scripts: Incomed application of command. Data pries: Data overwrite, wax of structure. Design documents: Specifications are not dear, make of the program of definitions. Pequinement definitions: Different understanding of requirements.						
Implementation notes: The new functionality is wrong. Test cases: That the program es accepted even without being accepted by the public. Took of time. Deployment scripts: Incomet application of command. Dota extes: Dota overwrite, Lack of structure. Design downents: Specifications are not dear, make of the rent Obsigns.			-Misspel	led vortables		1.00
